

**Interim report  
for the six months ended  
30 June 2010**

**EURASIA MINING PLC**

**Chairman's statement**

For the first six months of 2010, your company has been working on finalizing the mining licence for the West Kytlim project in the Urals in Russia. We have been making steady progress and hope that the process will be concluded in the nearest future. Management believe the delay is worthwhile if it allows us to achieve the best outcome for the years of planned platinum production ahead of us.

At our Kola projects, drilling on the newly identified mineralized zone at Monchetundra commenced in September. Results from this programme will be released as they become available. If successful, a new resource here would add considerably to the PGM potential of this licence area.

The Company is continuing to look at a new pipeline of projects in Russia while keeping abreast of developments in Russian mining and licensing legislation. The outlook for mineral exploration and development continues to look positive and the board is evaluating new opportunities in this environment. The Board looks forward to delivering further updates on project opportunities and existing licenses over the next few months.

**Dr. Michael Martineau**  
*Chairman*
